

GUDA 2.0 (Guda Plus)

Guda 2.0 (also you can find it as Guda Plus) is a classic Guda model which has been made for several years and does not lose its popularity. It is made of hard stainless steel, has overtone tongues (main tone+overtone) and manually decorated. It has 9 notes by default (since it could be made with 10 or 11 tongues). Guda 2.0 has variety of options, it can be upgraded to Fx version (installing electronics inside), you can choose lots of finishing types, designs and scales. It has balanced classic Guda sound with bright overtones

- Note Range: from D3 to E5 note, 440 Hz or 432 Hz tunings
- Materials: hard stainless steel
- Diameter: 50 cm (20"), Height: 225 cm, (9"), Weight: 4,5 kg

GUDA DOUBLE

Guda Double is our flagman model, it has the largest sizes, most advanced sound and gives extended abilities to player. As the name implies, Guda Double pan has both sides tuned. And this is a powerful feature that allows to have different scales on one instrument. But Guda Double by Zen Percussion is more than just two-sided tongue drum. Both sides are adjusted in such a way that the sound of one is amplified by the other side. Thus, the effect of natural reverberation is achieved. Overall sound is very rich with huge sustain and pleasant overtones. We recommend Guda Double for meditation and relaxation but also it is good for single playing - if play alone you have the feeling that someone accompanies you. Which of course does not prevent you from jamming with other musicians. Double has lots of options and could be upgraded to Fx version

- Note Range: D3 to E5 note, 440 Hz or 432 Hz tunings
- Materials: hard stainless steel
- Diameter: 51 cm (20.5"), Height: 230 cm, (9,2"), Weight: 5,0 kg

GUDA Ortus Brass

Guda Ortus has original goblet shape and made of brass (top side) and aluminum (bottom goblet-shape side). Such combination of materials and shape has lots of advantages: due to goblet shape the sound is much louder with good sustain and volume, brass gives very deep, warm and low sound and thanks to aluminum it is light weight (also aluminum gives additional loudness and brightness). Also, such shape is very convenient. Ortus has 9 overtone double tongues (central one + 8), the tone is very solid – you will be really surprised to hear such deep sound from such compact instrument

- Note Range: D3 to C5 note, 440 Hz or 432 Hz tunings
- Materials: solid brass and aluminum
- Diameter: 35 cm (14"), Height: 16 cm, (6,5"), Weight: 2,5 kg

Prices	
Guda Ortus model	\$500
Design	\$50-125

GUDA Ortus Ultra Bass

Guda Ortus Ultra Bass is the ultimate model, probably the most deep sounding tongue pan in the world. It has very deep warm sound with perfect sustain and rich overtones. Tongues have triple construction so you can hear not only low notes but high notes as well. Top is made of solid brass and the bottom is made of thick aluminum for better resonance and volume. The instrument is absolutely stainless, like all our other models. Ortus Ultra has 11 triple tongues and wide range of tones. Lowest possible note is D2 ! Ideal instrument for relaxation, meditation, sound healing and for playing of course.

- Note Range: D2 to C5 note, 440 Hz or 432 Hz tunings
- Materials: solid brass and aluminum
- Diameter: 44 cm (17,5"), Height: 27 cm, (10,5"), Weight: 4,25 kg

GUDA Coin Brass

Guda Coin combines many features from other Guda models: it is compact like Freezbee and like Guda Double has both sides tuned in different scales, top side is made of brass and has double tongue construction. Bottom side is made of aluminum and has single tongues. Such combination makes Coin really unique instrument – top brass side has low and warm sound with lots of overtones, ideal for meditation and relaxation. While aluminum side has bright and sharp sound, that is very good for fast playing.

Also the note range of Coin is very wide: brass side has D3 to C5, while aluminum has more high diapason (from C4 to C6). Thus we have a new model with compact sizes, cool sound and very wide frequency range (from D3 to C6).

- Note Range: D3 to C6 note, 440 Hz or 432 Hz tunings
- Materials: solid brass and aluminum
- Diameter: 35 cm (14”), Height: 9,0 cm, (3,5”), Weight: 2,7 kg

Prices	
Guda Coin model	\$550
Design (simple)	+\$30
Design (standard)	+\$40
Design (Custom and premium designs)	+\$55, depends on complexity

GUDA Freezbee

Guda Freezbee is the compact tongue drum, made of the same materials as our senior models, but with price less than twice. We use the same sort of high quality hard stainless steel as we use for all GUDA models and the same method of gluing. Freezbee weighs only 2 kg and has pretty small dimensions, so you can take easily even several pieces at once in your journey. The sound of Freezbee is warm, percussive, without any metal tones. It has shorter sustain and the tone is a bit like wooden drums.

- Note Range: A3 to E5 note, 440 Hz or 432 Hz tunings
- Materials: Hard stainless steel
- Diameter: 35 cm (14"), Height: 8,7 cm, (3,5"), Weight: 2,2 kg

Prices	
Guda Freezbee model	\$250
Design (simple)	+\$30
Design (standard)	+\$40
Design (Custom and premium designs)	+\$55, depends on complexity

GUDA® by Zen Percussion.

Zen Percussion company has been producing **Guda** instruments since 2013. We use only premium materials (stainless steel, brass, aluminum), our instruments are engraved by hand and come with quality accessories. We have 6 main models which have different sizes, sound and features but all of them handcrafted carefully and are 100% stainless.

We make instruments for [order](#) but you also can find some in our stock: <https://guda-drum.com/store>

Most of our **designs** could be found here: <http://guda-drum.com/design> . All Guda Drums are engraved **manually**

Popular Guda scales: <https://guda-drum.com/scales> (custom scales are available)

Guda videos: <https://guda-drum.com/video> (you can use filters to select scales and model)
